TROOPS DECLARE A DRAW IN BATTLE WITH WINTER—The principal enemy faced by Canadian forces participating in Exercise Sun Dog Three, in Igloos, Labrador, was Old Man Winter. The troops don't claim a victory but think it could be called a draw. Maning a machine-gun post are: Pte. T. R. Janssen, Lachine, Que.; Pte. W. A. Delaney, New Carlisle, Que. and Pte. W. E. Hubbard, Toronto—Central Press Canadian photos.

EDMONTON TRANSPLANTS SCOTS TO BUILD UP POLICE FORCE selected from among 87 applicants for the vacant positions in Edmonton. —Additions to Edmonton's police force are these immigrants from Glas. Among them is Margaret, Pearson, policewoman. —Central Press Canadian.

In Exercise Sun Dog, paratroops flurried down on the Labrador snow so brilliant, cold sunbline. The joint R.A.F.-Army operation was held to test equipment and technique in repelling potential invaders.

QUEEN MOTHER RECEIVES BEARER PARTY—The bearer party of the King's Company, 1st Battalion Grenadier Guards, who carried the coffin of the late King George VI during the funeral ceremonies, have been greeted by the Queen Mother at Buckingham Palace. The bearers were each given a signed photograph which they are seen carrying in large envelopes as they left the palace.

NATURE LETS GO A BROADSIDE—British troops in Innisville have other foes to contend besides Egyptian irregulars. Here are two members of the Lancashire Regiment as they battle their way through a severe snowstorm while on patrol duty along the Treaty Road north of Fayed, Egypt.—Central Press Canadian.

BULLET-PROOF VESTS PROVE THEIR VALUE—During a demonstration of its new nylon bullet-resistant body armor, a U.S. Marine poses with a Thompson submachine gun on a dummy wearing one of the vests. The jackets, now worn by Marines on patrol in Korea, can stop 40 calibre bullets and are used as a protection against fragmentation shells. The tests were made in Washington, D.C.—Central Press Canadian.

WHOLE TOWN MOVED FROM SITE—The last mail from the town postoffice is collected in Elizabethton, N.C., just before the place was wiped off the map to make way for the U.S. Atomic Energy Commission's giant hydrogen-bomb project. Heading goodbye to their families P.O. box are Mrs. E. R. Dupont and her daughter, to Ann. The 600 residents of the North Carolina village have moved out and begun to set up New Elizabethton nearby.—Central Press Canadian.

COLD SNOW AND ICE GLOW with life and feeling as German artist Joseph Eidelbauer creates his scene in front of Montreal's Christ Church Cathedral. Eidelbauer is attracting even more attention with his Biblical tableaux than with his previous ice creations in Montreal and the Laurentians. Public response is enthusiastic, but the sculptor says he is planning to return to his native Germany because he "cannot earn enough to live in this country."

STORM PARALYZES EAST COAST — One of the worst storms in years has swept the Maritimes and the New England coast bringing ice and highway traffic almost to a standstill. Two are dead and many others feared lost in Nova Scotia alone. These photos show Cape Cod, Mass., where 20-foot snowdrifts buried hundreds of cars. The motorist, (above), is cautiously proceeding along a highway cleared by a rotary plow.

NEW STAMP—Canada is to issue new 20 cent twenty stamp on April 1.

WEDDING DATE AFTER 40 YEARS—A romance begun 40 years ago will culminate this spring in the marriage of Ethel H. Lane, night nurse at the Westmountal Veterans' Club, and Miss Lane. The couple first met in 1912 when Dr. Weyman was a British hospital. They met several times in the intervening years, then, last December, set the date for the wedding.—Central Press Canadian.

WITH NEW FACE, TO BE GOOD AS NEW—The stern half of the tanker Fort Mercer which broke in two in a storm off Massachusetts, reach Massachusetts, U.S., under tow of two tugboats with 13 men on board. Here one of the 13, Arthur Cunningham, oiler, of Seattle, Washington, examines the stern beam, the point at which the 10,000-ton vessel was severed. The 15 will get salvage money reward for staying with the ship which will be fitted with a new bow.—Central Press Canadian.

DOESN'T ADVISE 12 WIVES FOR OTHERS—Francisco Julian, 47-year-old farmer living near Rio de Janeiro, Brazil, poses with 10 of his 12 wives, all of whom live happily together in the Julian household. The two missing wives were in the hospital at the time this picture was made, awaiting arrival of children. The Julian household now has 23 offspring, plus three more which some of the wives brought with them. The farmer told a reporter that he started collecting "wives" in 1934 when he suddenly found he had five women living in his home. On market-day, the farmer loads all of his wives into a truck and journeys to a nearby town. He says the townfolk do not suspect any harm but he doesn't advise any man to follow his example.—Central Press Canadian.

BRITISH DEAD FILL PALERMO MORGUE—Residents of Palermo, Italy, carry coffins containing bodies of perished persons were killed to the recent crash of a British flying liner on Mount Etna, near Palermo. The Italian mortuary folk found a long and silent procession as dead were taken down the mountain slope to local morgues.—Central Press Canadian.

BRITISH, U.S. SEA FORDS CONFER—Chatting in the British admiralty office in London are James P. L. Thomas, first lord of the admiralty, (left), and Admiral Lynde D. McCormick, U.S. supreme allied commander in the Atlantic. Admiral McCormick flew to London from Paris to discuss naval strategies with British sea commanders.—Central Press Canadian.

DENT-PROOF CARS

There was a time when an automobile fender was a thing apart. If, through the driver's bad luck or carelessness, the projecting mud guard was crumpled or torn, it could be unbolted and replaced or repaired for a few dollars.

The modern fender is a study in beauty; where it ends and the body proper begins, is difficult to define. The dismayed motorist of today, looking down at his mutilated fender, is looking at a major repair job. But the day when a wheel is twenty-five cents a dollar will be enough to straighten those out.

A bump which would give an ordinary car a crumpled fender leaves the plastic car unscathed. The 2-inch thick plastic simple springs back into its proper contours. The car is not indestruc-

It may be a bit early yet for motorists to start placing orders for plastic cars, but the possibilities are pleasant to contemplate. Among them are cheaper cars, fewer and lighter repair bills, reduced insurance rates and the ability to take a nudge in the fender with tranquillity.

Local and District

Mrs. M. Chedore is a patient in Drumheller hospital.

It is reported that the A. I. Gordon farm has been sold to Mark Williams.

Jim Martin and Hardie Friesley, who have been working in the oil fields during the winter, returned to Delia this week.

Pete Nielsen, who has spent some time in Calgary recently, arrived in Delta Wednesday of last week.

Mr. and Mrs. S. M. Thompson of Craigville, a son.

Messrs. Henry Larkin & Francis Isaac, from Clareholm, arrived in Delta this week to take over the business formerly operated by W. D. Fitzsimmons.

Gordon Cousins has accepted an appointment with the Beattie Manufacturing Company in Canada.

Bright, sunny days and frosty nights are helping to banish the snow—at least in the village, but there is evidence of much subsoil moisture. In the country, however, there is said to be a lot of snow yet to disappear.

Montreal, March 31—Operating revenues for the Canadian National System all inclusive, for the month of February, 1952, amounted to \$52,038,000. Operating expenses were \$52,080,000. The net operating deficit was \$42,000. In February, 1951, revenues were \$43,352,000, expenses \$43,948,000, and the net operating deficit \$596,000.

Three figures are operating revenues and expenses only, not including taxes, equipment rentals, baggage charges, etc.

Corvinton, Ky., has the smallest church in the world, seating three

Spring Tune-Up For Tractor

Whether the tractor has been used all winter or not, this is a good time to check the machine and have it top operating condition for spring work. C. A. Cheevers, Extension Agricultural Engineer, Alberta Department of Agriculture, offers the following suggestions:—

The lubricating system should be flushed and refilled with new oil to the proper viscosity, and natural should be done while the engine is warm. Mineral or premium oil should not be replaced with heavy duty oil unless proper change-over procedure is followed.

Transmission should be changed every spring, and manufacturers' recommendations, as set forth in the instruction book, should be followed.

Fuel level in the carburetor should be checked at least once a year, as adjustments made to keep it at

or servicer. If necessary it can be done at home simply by using rubber hoes and a short length of gasline tube. If the fuel level is too high, heavy fuel consumption and carbon accumulation results, while a low fuel level gives a lean mixture with high temperature and possible valve damage.

The ignition system should be checked, spark plugs regapped, replaced, wiring examined and the timing checked. Detailed instructions for such check-up procedures are generally given in the operator's manual supplied with the tractor.

cation, fuel and ignition system the whole machine should be cleaned, and the clutch, brakes and steering adjusted. Doing this work now can save both hours and dollars.

RADIO

The following are among the highlights of programs to be heard on CBC stations on Thursday, Friday, Saturday and Sunday, April 3, 5 and 6. All times mentioned are Mountain Standard Time.

Ready for Spring?

Lethbridge Experimental Station
Weekly Letter.

on the farm is always somewhat a task, and after last fall, the ch is likely to be more so than usual. A supply of good seed should be hand very shortly, if it is not present in the bin. A number considerations are involved in use of the term "good seed". It should be the recommended vari of the particular grain in quest, most suited to local conditi should be clean and free from kinds of weed seeds, and possess germination. Thus, a change to different variety may be called seed cleaning may be necessary, germination of it should be estaimed.

When the seed is on hand and implements in top condition, preparations are still not complete. Even though we are going to

that the drop will not be entirely free of weeds. The pre-sowing cultural operations may help to reduce the potential weed infestation but more than likely further weed control measure will be called for. Therefore, to round out the preparations it would be good to check the machine used for applying the killing chemicals, and to make use of a supply of the chemical itself. Experiments at the Lethbridge Experimental Station and the experience of others over the last 5 years may justify the use of herbicides such as 2,4-D in all types of grain or when weed infestation warrants, as provided that the chemicals are applied at the recommended rate and dosage. Reasonably accurate and reliable information on these points is available from your local District Extension Officer.

Preparations for any campaign are seldom complete in the smallest of detail, but the points mentioned should not be overlooked if we are to be ready for spring.

NEW CHRYSLERS

Here is a view of the new car on display recently by Chrysler. The experimental car has a wheelbase of 110 inches, an overall length of 220 inches, and a height of 59 inches. It seats
